support@siritech.net

Comprehensive Support for Remote Work

In response to the pandemic, we expanded our services to deliver IT and power backup products nationwide, ensuring seamless remote work capabilities across India.

We pick up and drop all IT and Power products anywhere in

India, Nepal and Bhutan

IT Sales

At Siri TechnoFabs (STF), we assist organizations in mitigating IT downtime and enhancing productivity by designing, implementing, and migrating IT infrastructure tailored to their specific needs. We provide a comprehensive range of IT infrastructure solutions under one roof. STF offers a wide variety of products, including servers, workstations, desktops, laptops, storage solutions, networking equipment, and power backup systems. Additionally, we supply essential components such as motherboards, hard disks, RAM, and processors. Our partnerships with leading IT product manufacturers enable us to deliver high-quality solutions.

We are an **authorized distributor and channel partner across India** for renowned brands such as **Apple, Dell, HP, Microsoft, Havells, Studer, and many more.**

IT Support

STF addresses all IT support needs efficiently and effectively. Our strategic partnerships with leading IT manufacturers enable us to deliver top-tier support services and solutions. Committed to providing exceptional IT support to businesses across India, STF helps clients achieve operational excellence and technological superiority.

Hardware and Software

At STF, our highly trained and qualified engineering team is equipped to handle all types of unit-level hardware support across various domains.

Servers and Workstations

Our certified engineers specialize in branded servers and workstations, including Dell, HP, Lenovo, Apple, and SUN. We provide comprehensive services such as hardware upgrades, maintenance, annual maintenance contracts (AMC), consultations, design, and implementation, all delivered in a cost-effective manner.

Storage and Cloud Services

STF boasts a professional team adept at managing all brands, models, and types of IT storage and cloud technologies.

Desktops and Laptops

Our well-trained and certified team handles installations, upgrades, annual maintenance contracts (AMCs), and all related services, including chip-level repairs, for desktops and laptops.

Networking Solutions

We provide comprehensive networking solutions for companies. Our certified team specializes in designing, procuring, implementing, testing, and handing over networks for voice, data, wired, wireless, and optical systems.

IT Security

We design and implement comprehensive security solutions tailored to your firm's needs. Our experts manage firewalls and both cloud-based and non-cloud-based antivirus systems.

Power Backup Solutions and Renewable Energy (www.energy.siritech.net)

Our electrical engineering team offers power-saving consultations, power backup solutions, and power generation solutions ranging from kilowatts to megawatts. We are an all-India distributor for Havell's and Studer (Swiss) power and renewable energy products.

Data Recovery

Our state-of-the-art data recovery lab and trained engineering team can recover data from DAT, DLT, hard disks (IDE, SATA, SAS, SCSI, SSDs), NAS, SAN, various RAIDs, pen drives, and SD cards across formats such as Windows, Linux, SUN, and Apple.

Industrial, Medical, and Embedded Systems

We serve a diverse clientele in industrial PCs and embedded systems. Our services include design, procurement, implementation, and testing of industrial PCs and networks. We provide comprehensive support for industrial PCs and automation machines, offering unit-level, card-level, and chip-level service and upgrades. Additionally, we offer support and consultation for industrial communications across wired, wireless, and optical networks.

Telecommunications

Our RF and communication lab is equipped to handle a variety of communication devices, including two-way radios (HF, VHF, UHF, SATCOM devices). We also provide service and support for various models of set-top boxes.

Rental Services

STF offers a wide range of rental equipment, including servers, workstations, desktops, laptops, printers, monitors, and projectors. Our dedicated support team ensures high-quality service and customer satisfaction.

Recycle and Refurbish

We promote sustainability by extending the lifecycle of electronic devices. By repairing and refurbishing gadgets, we help reduce e-waste. For example, repairing a 1st generation laptop instead of buying a 2nd generation one postpones the need for a new device until the 3rd generation, thereby reducing e-waste by 33.33%.

Chip-Level Service

STF has operated one of India's premier chip-level lab facilities. Our team of highly qualified engineers specializes in servicing motherboards for servers, workstations, desktops, laptops, as well as industrial, medical, and telecom equipment.

Cloud and Web Services (www.pvalue.cloud)

STF offers reliable web hosting services through [Pvalue.cloud](http://www.pvalue.cloud). This complete end-to-end service includes all hosting facilities utilizing the latest technologies, such as light speed hosting. Our advanced hosting solutions ensure optimal performance and security for your online presence.

Internet Service Provider (ISP)

Siri Technofabs (STF) delivers cutting-edge connectivity technology and unmatched service level agreements (SLAs) by partnering with [Tata Tele Business Services](#) (TTBS) for both voice and data services.

IPAF Training (www.training.siritech.net)

Bringing [IPAF Training in India](#): IPAF promotes the safe and effective use of powered access equipment worldwide. Elevating safety awareness with global certification and on-premises training, delivered by skilled and experienced trainers. IPAF training is required for aerial work platforms operators. STF offers IPAF course for professionals and grant IPAF certifications after training.
